Summary: The Geological Survey of Norway is in the process of compiling an inventory of hard rock aggregate deposits in coastal Norway. This report contains a catalogue of Norwegian coastal quarries presently in production, as well as potential production areas along the coast of southern Norway. 10 million tonnes of aggregates were exported to Europe in 2003, of which about 2 million tonnes was used by the offshore oil and gas industry on the continental shelf.

Maps of quarries and potential deposits of hard rock aggregate and sand/gravel in South-Norway	18

INTRODUCTION

The Norwegian production of hardrock aggregates amounted to about 36 million tonnes in 2003. In addition, 15 million tonnes of sand/gravel were produced.

A total of 10 million tonnes of aggregate and 0.17 million tonnes of sand and gravel were exported, with an export value of NOK 450 million (or 56 mill EUR), from 20 hard rock aggregate- and 3 sand and gravel producers in Rogaland county (statistics compiled by NGU and the producers); see pages 5-7. Export of hard rock aggregate represents 28 % of the total hard rock production. Aggregates are used in the following ways: roads (64%), offshore (17 %), concrete (10 %) and other use (9%). The majority of the quarrying companies are relatively small, catering essentially for local needs. There are, however, a number of major players including Oster Pukk og Grus A/S, NorStone, Kolo-Veidekke AS, NCC Roads AS, Halsvik Aggregates A/S and Franzefoss Pukk A/S. These companies each have an annual production in the order of 1-2.5 million tonnes. The largest individual aggregate quarry (gneiss) owned by Norsk Stein A/S had a production of approx. 3.0 million tonnes in 2003. Export of aggregates for use offshore, mostly in Norwegian sectors of the North Sea was 2 million tonnes in 2003. The exported sand and gravel is from three quarries in Rogaland.

Norway is probably northern Europe's principal **hardrock** country being composed almost entirely of Precambrian and Palaeozoic igneous and metamorphic rocks. Norway has a long, indented and rugged coastline where a considerable variety of rocks suitable for aggregate production are well exposed. Deep-water anchorage, low tidal range and a well-developed infrastructure allow for planning of harbour facilities for medium-large size bulk carriers. Norway has an attractive investment and taxation climate and overseas investment is encouraged. National and local authorities are aware of the potential for the development of large coastal quarries (super-quarries) designed for the production and export of rock aggregates. The Geological Survey of Norway (NGU) is undertaking a number of investigations of potential coastal sites for such quarries, in order that local government planners will be able to classify such sites for future development. In Bremanger municipality, one new quarry is planned and will start production of green sandstone in 2004, with PSV from 58 to 62. Bremanger Quarry AS has started a small export production to Netherlands in 2001. A new sandstone quarry is planned in Flora commune.

NGU is planning to map, in cooperation with counties, local authorities and industry, the potential for new coastal rock units for which environmental, topographic and transport criteria would favour quarrying.

The Gravel- and Aggregate database has been placed on the Internet and includes digital maps for zooming in on the quarries:

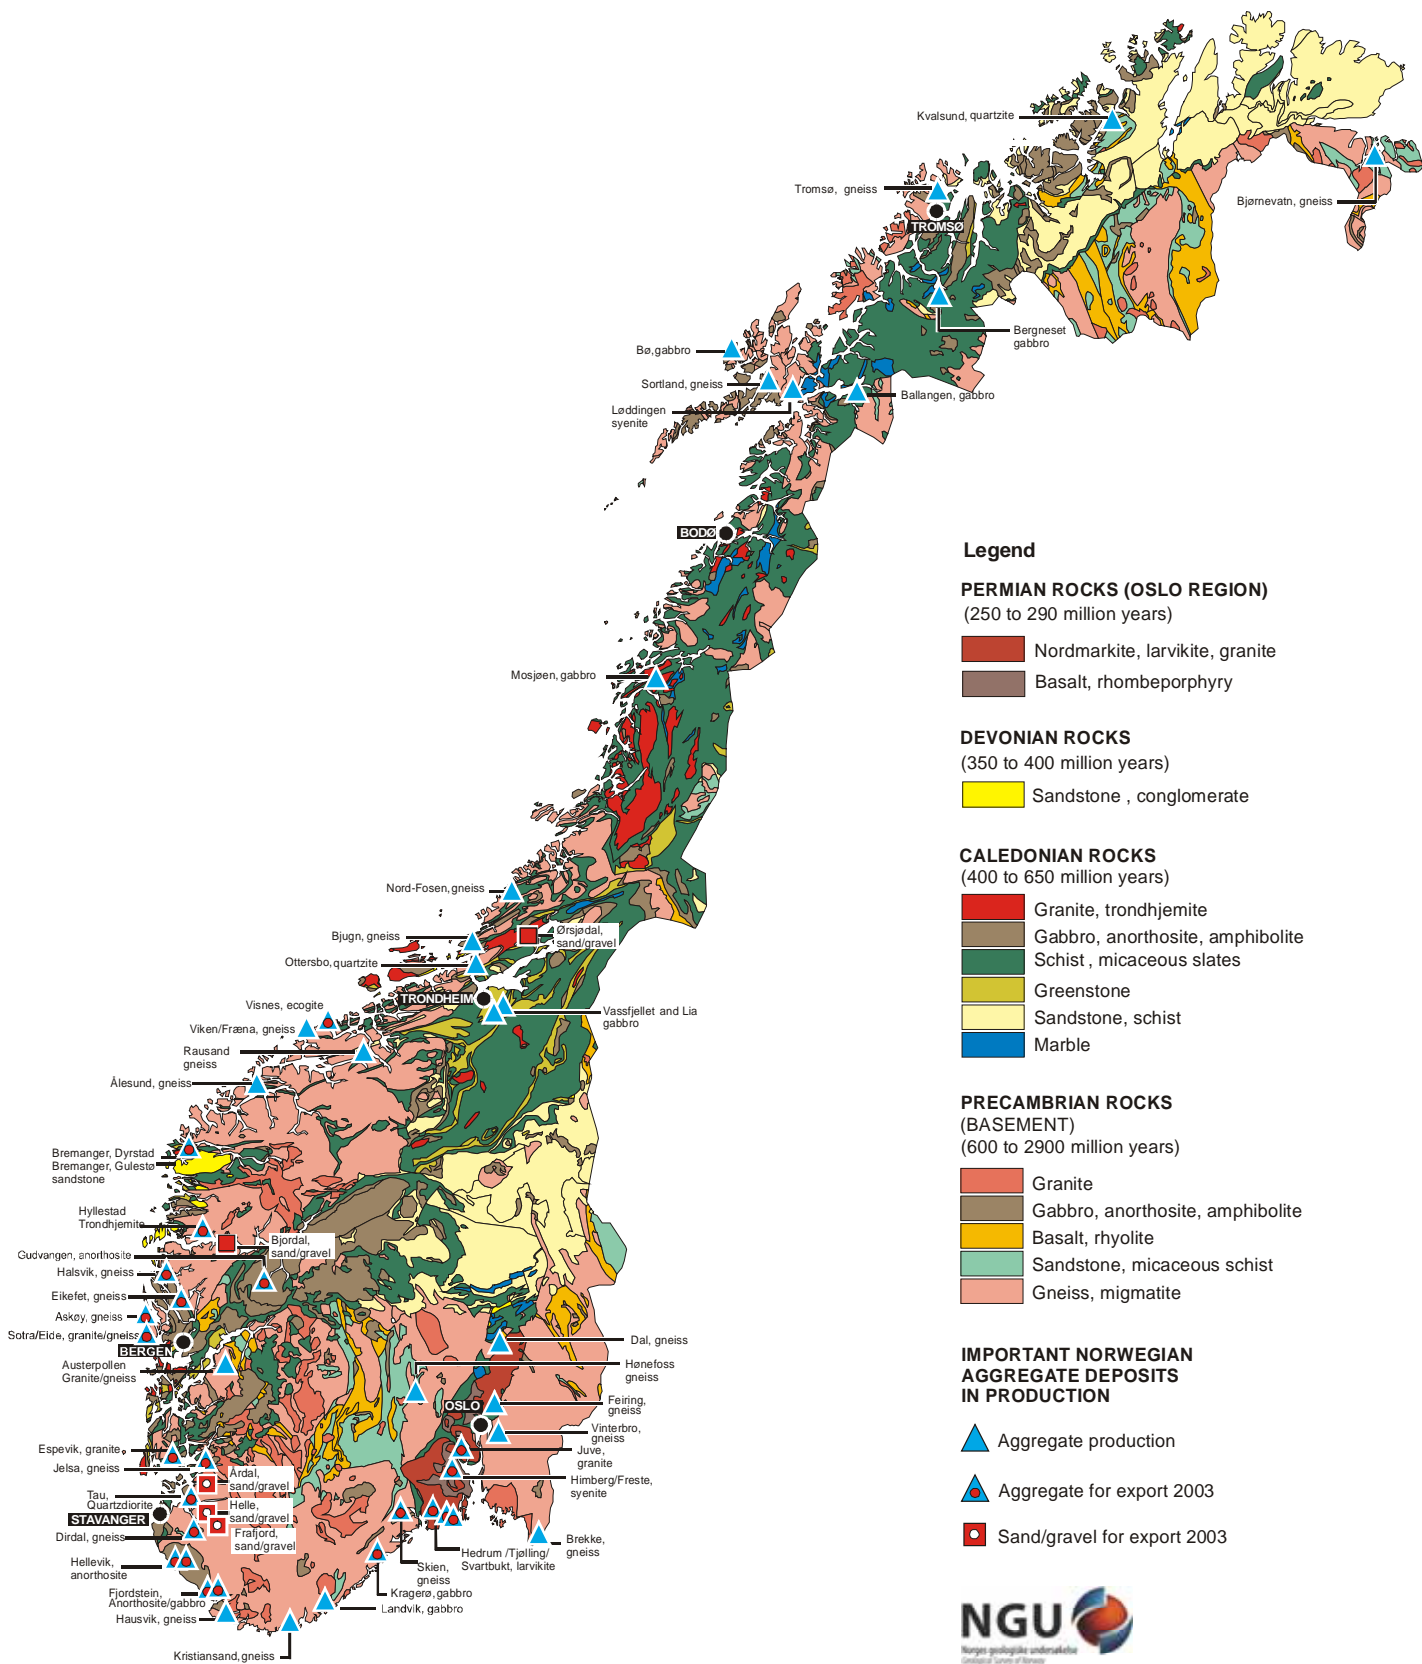

<http://www.ngu.no/grusogpukk> or <http://www.ngu.no>

The next report will be available in April 2005.

BEDROCK MAP OF NORWAY WITH IMPORTANT AGGREGATE DEPOSITS

- Legend**
- PERMIAN ROCKS (OSLO REGION)**
(250 to 290 million years)
- Nordmarkite, larvikite, granite
 - Basalt, rhombeporphyr
- DEVONIAN ROCKS**
(350 to 400 million years)
- Sandstone, conglomerate
- CALEDONIAN ROCKS**
(400 to 650 million years)
- Granite, trondhjemite
 - Gabbro, anorthosite, amphibolite
 - Schist, micaceous slates
 - Greenstone
 - Sandstone, schist
 - Marble
- PRECAMBRIAN ROCKS (BASEMENT)**
(600 to 2900 million years)
- Granite
 - Gabbro, anorthosite, amphibolite
 - Basalt, rhyolite
 - Sandstone, micaceous schist
 - Gneiss, migmatite

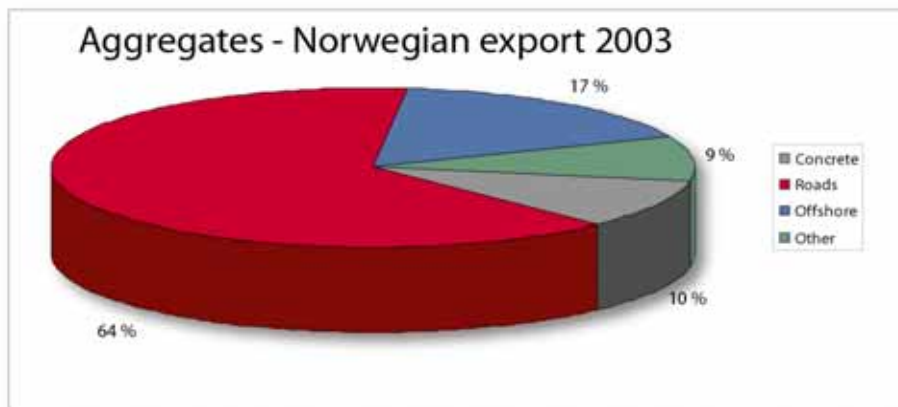

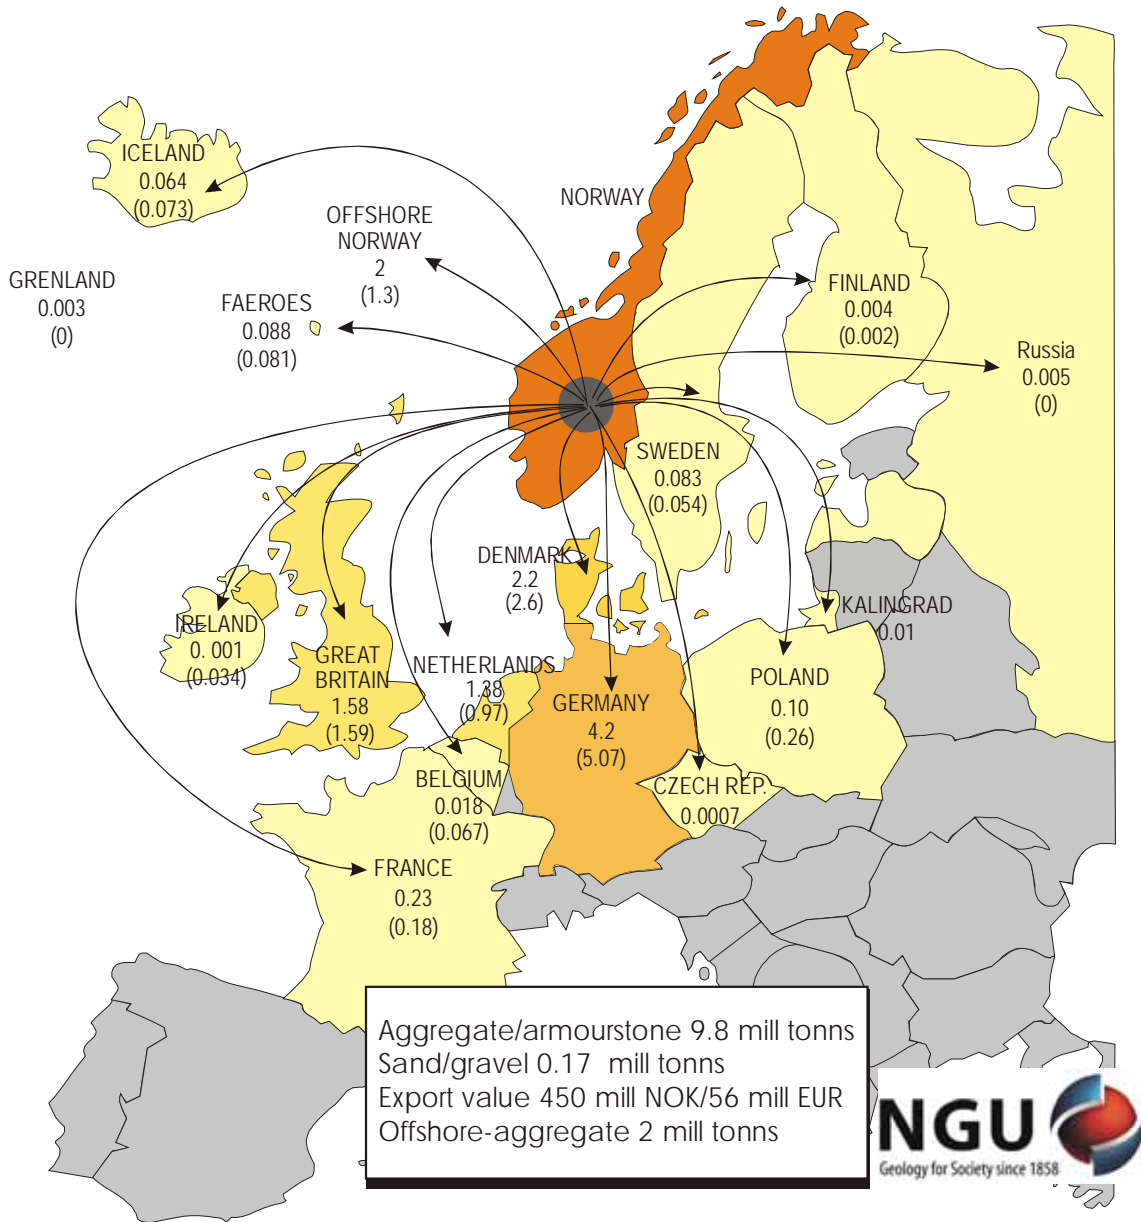

- IMPORTANT NORWEGIAN AGGREGATE DEPOSITS IN PRODUCTION**
- Aggregate production
 - Aggregate for export 2003
 - Sand/gravel for export 2003

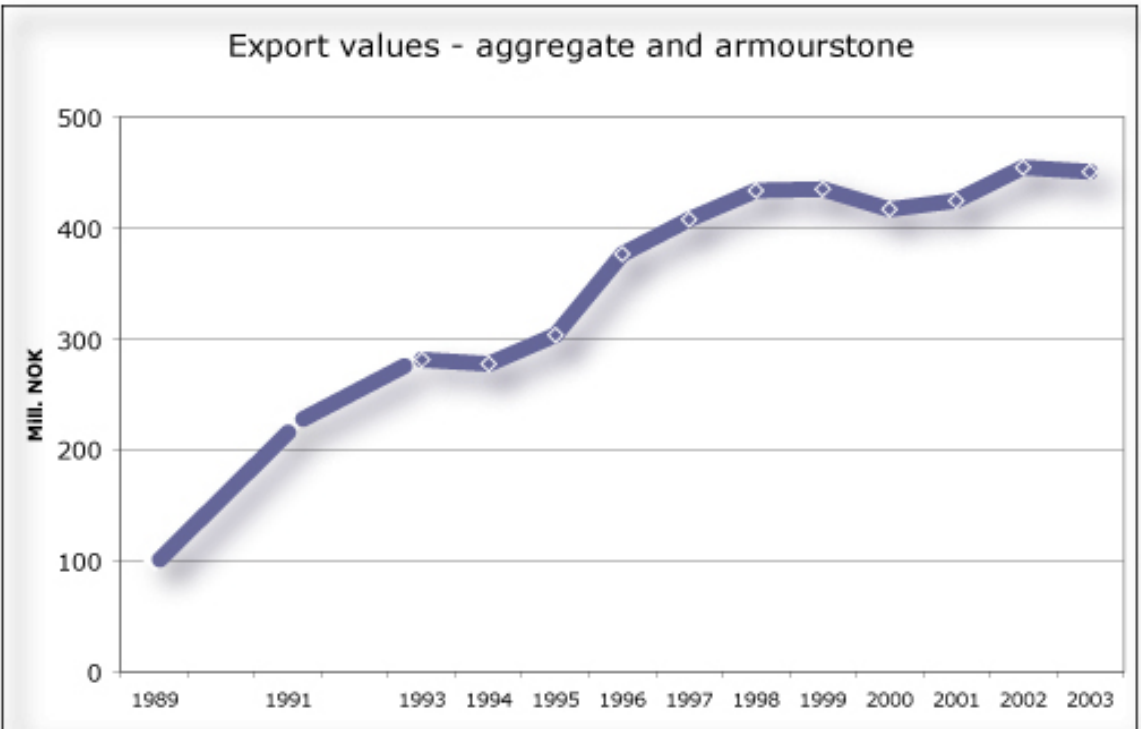

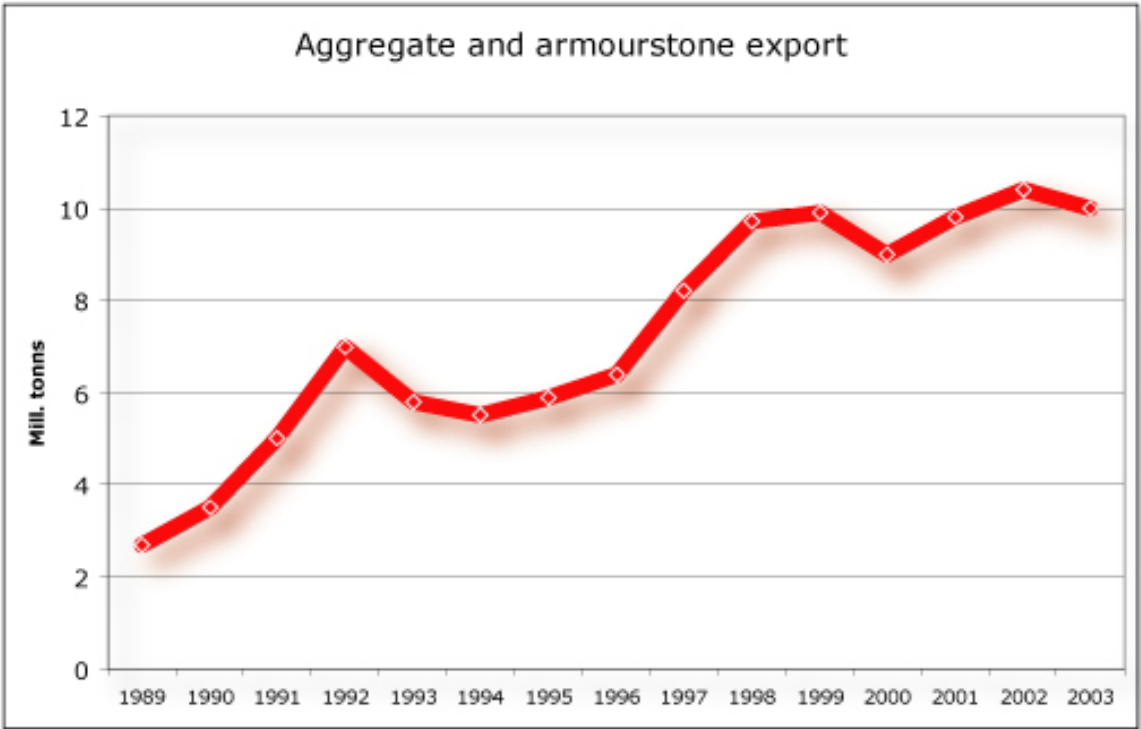

NORWEGIAN AGGREGATE FOR EXPORT IN 2003

Total production 12 mill. tonnes and export 10 mill. tonnes aggregate, armourstone, sand and gravel and in addition 2 mill. tonnes aggregate for offshore use.

Production values in parentheses are from 2002.

AGGREGATE EXPORT 1989-2003
