Summary: The Geological Survey of Norway has compiled an inventory of hard rock aggregate deposits in coastal Norway. This report contains a catalogue of Norwegian coastal quarries presently in production and exporting, as well as of potential production areas along the coast of South-Central Norway and Finnmark. In 2014, 21.8 million tonnes of aggregates were exported to Europe, and about 3.3 million tonnes were used by the offshore oil and gas industry on the continental shelf.

INTRODUCTION

The production of hard-rock aggregates in Norway amounted to about 66 million tonnes in 2014. In addition, 14 million tonnes of sand/gravel were produced, reference :Mineralressurser i Norge 2014.

A total of 21.7 million tonnes of hard-rock aggregates and 0.09 million tonnes of sand and gravel were exported, with an export value of 1282 million NOK (or 152 mill EUR), from 23 hard-rock aggregate and 6 sand- and gravel producers (statistics compiled by NGU and the producers; see pages 5-7). Export of hard rock aggregate represents about 34 % of the total hard-rock production.

Aggregates are used in the following ways: roads (45 %), concrete (13 %) offshore (14 %) and other use (28 %). The majority of the quarrying companies are relatively small, catering essentially to local needs. There are, however, a number of major players including Norsk Stein A/S, Oster Pukk og Grus A/S, NorStone, Veidekke AS, NCC Roads AS, Yeoman Halsvik AS, Bremanger Quarry AS and Visnes Eclogite AS. These companies each have an annual production in the order of 1- 8.6 million tonnes. The largest individual aggregate quarry (gneiss) owned by Norsk Stein A/S had a production of approx. 8.6 million tonnes in 2014. Aggregates for use offshore, mostly in Norwegian sectors of the North Sea, amounted to 3.3 million tonnes in 2014 from producers. The exported sand and gravel came from six quarries in Rogaland, Buskerud, Nord Trøndelag and in Møre and Romsdal counties.

Norway is probably northern Europe's principal **hard-rock** country, being composed almost entirely of Precambrian and Palaeozoic igneous and metamorphic crystalline bedrock. Norway has a long and rugged coastline where a considerable variety of rocks, suitable for aggregate production, are well exposed. Deep-water anchorage, low tidal range and a well-developed infrastructure allow for planning of harbour facilities for medium to large - size bulk carriers. Norway has an attractive investment and taxation climate, and overseas investment is encouraged. National and local authorities are aware of the potential for the development of large coastal quarries (super-quarries) designed for the production and export of rock aggregates. The Geological Survey of Norway (NGU) is undertaking a number of investigations of potential coastal sites for such quarries, in order that local government planners will be able to classify such sites for future development. In Bremanger municipality, Bremanger Quarry AS started export production to the Netherlands in 2001. A new sandstone quarry, Norwegian Sandstone Export AS, started export production in Flora municipality in 2007. Tschudi Aggregates AS in Kirkenes, Bjørnevatn started export to Russia as offshore aggregates in 2011. Velde Pukk AS – Hausvik started export in 2013.

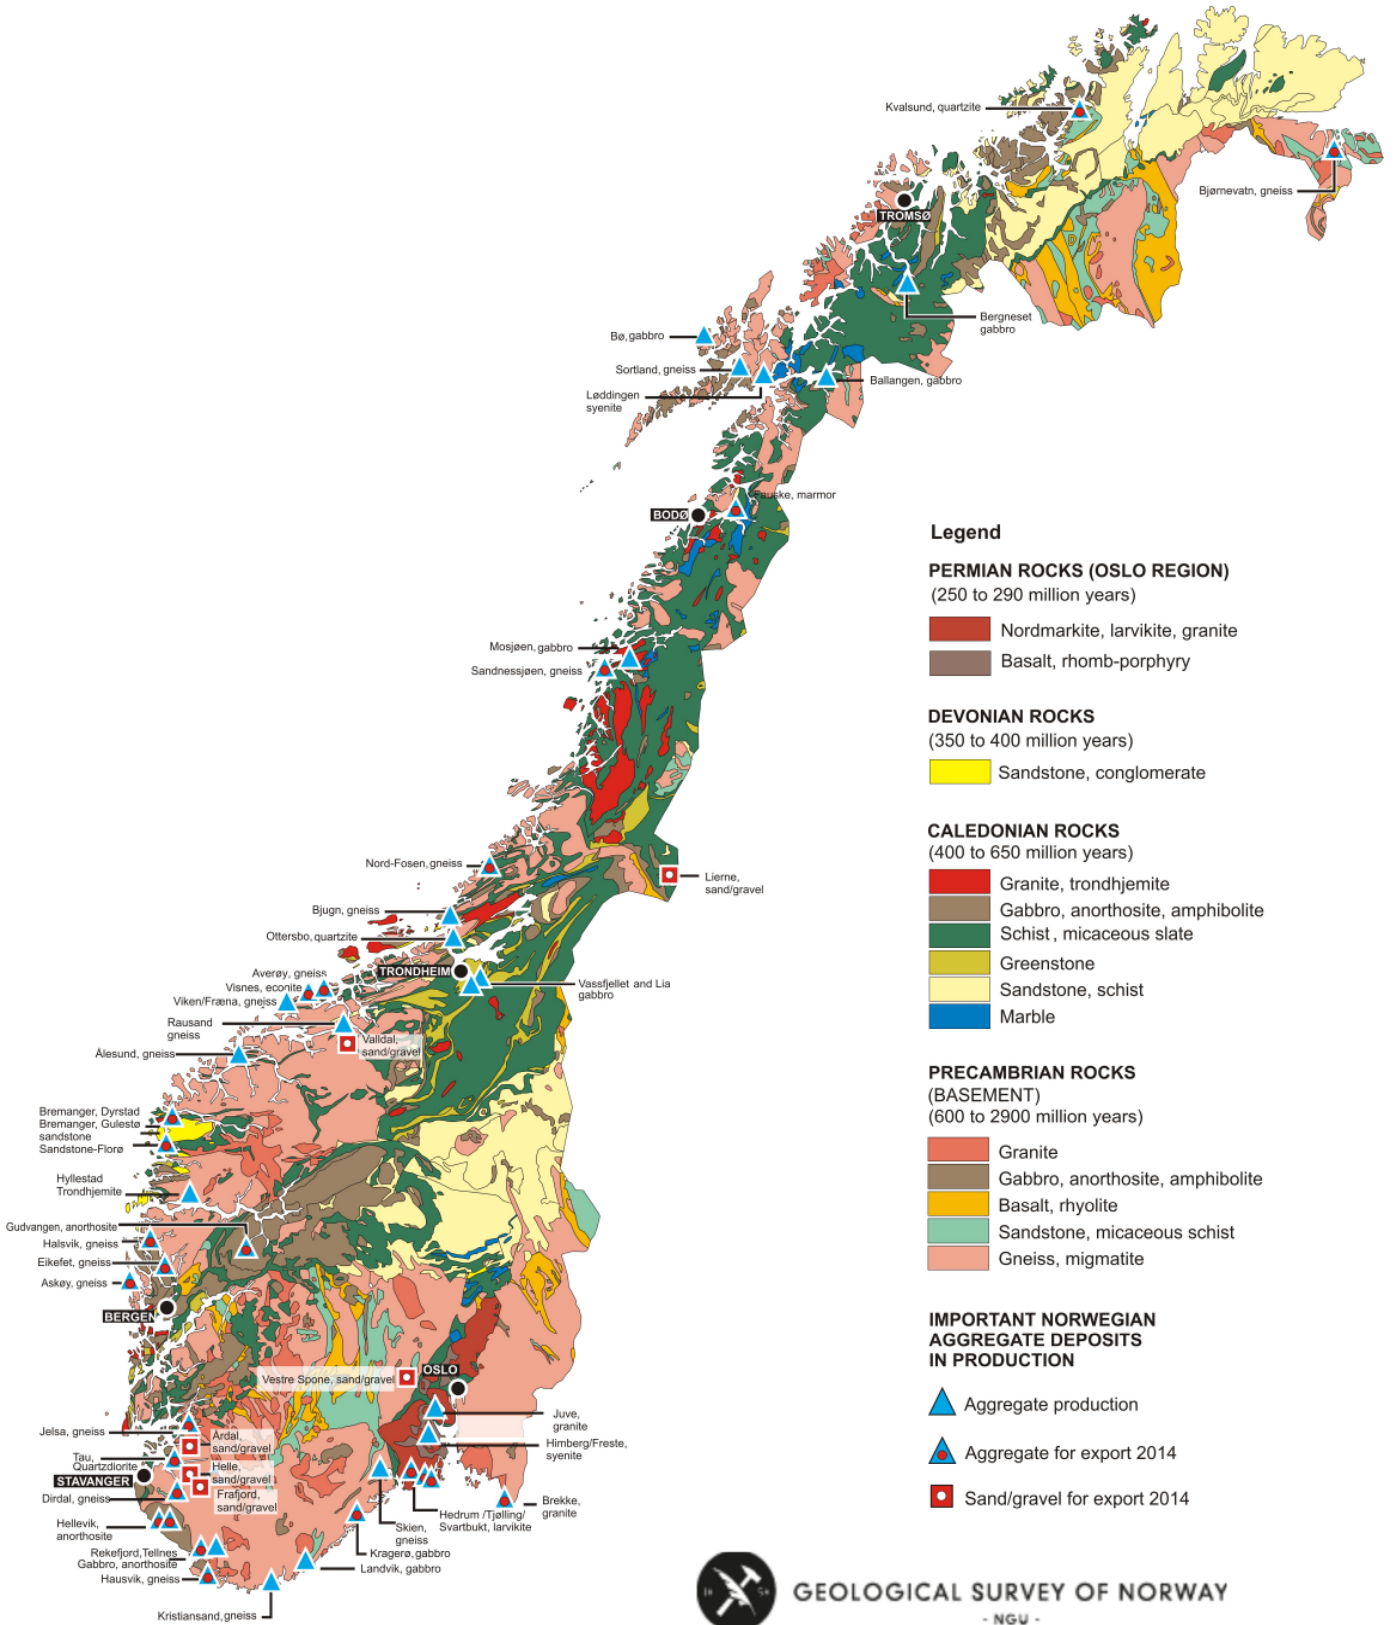

This report and the Database for *sand, gravel and hard-rock aggregates* are accessible on the Internet, including digital maps on individual quarries: http://www.ngu.no/kart/grus_pukk/ or <http://www.ngu.no>.

Aggregates

BEDROCK MAP OF NORWAY WITH IMPORTANT AGGREGATE DEPOSITS

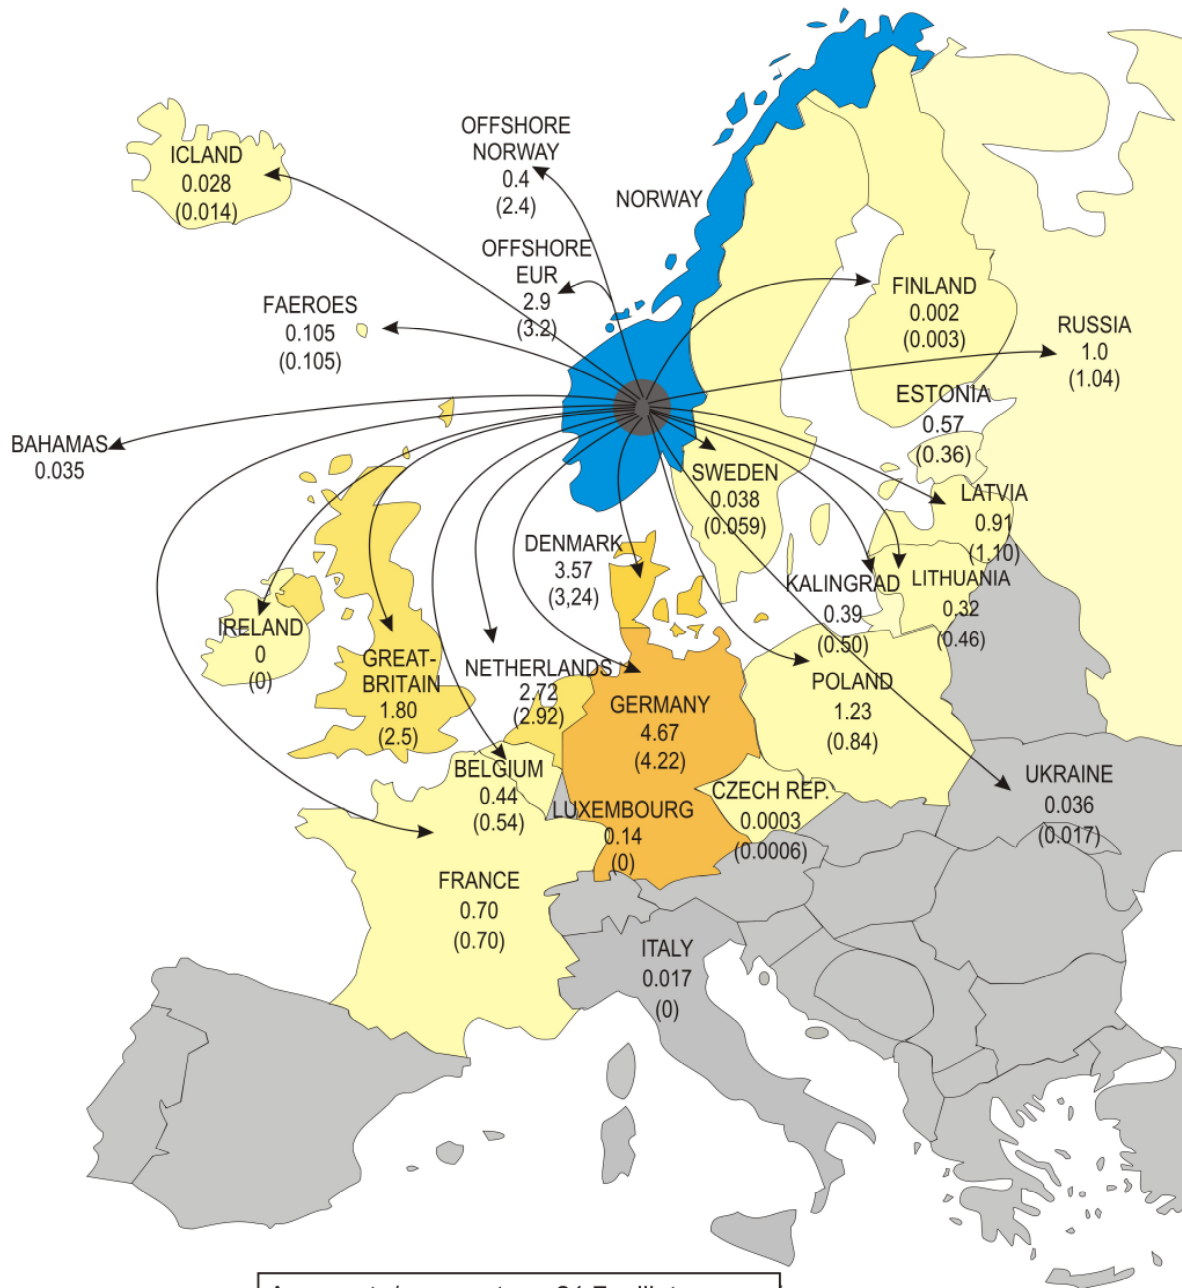

GEOLOGICAL SURVEY OF NORWAY
- NGU -

NORWEGIAN AGGREGATE EXPORTED IN 2014

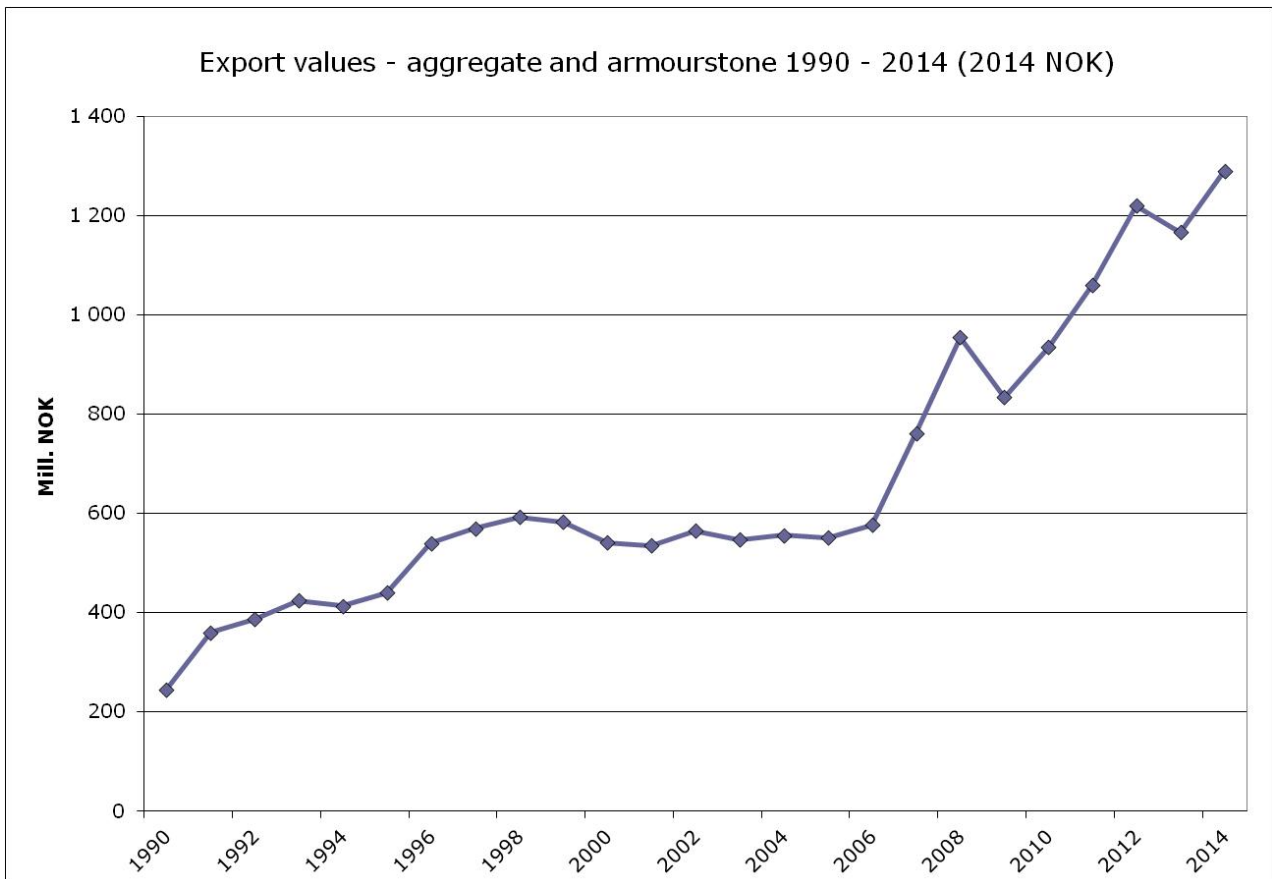

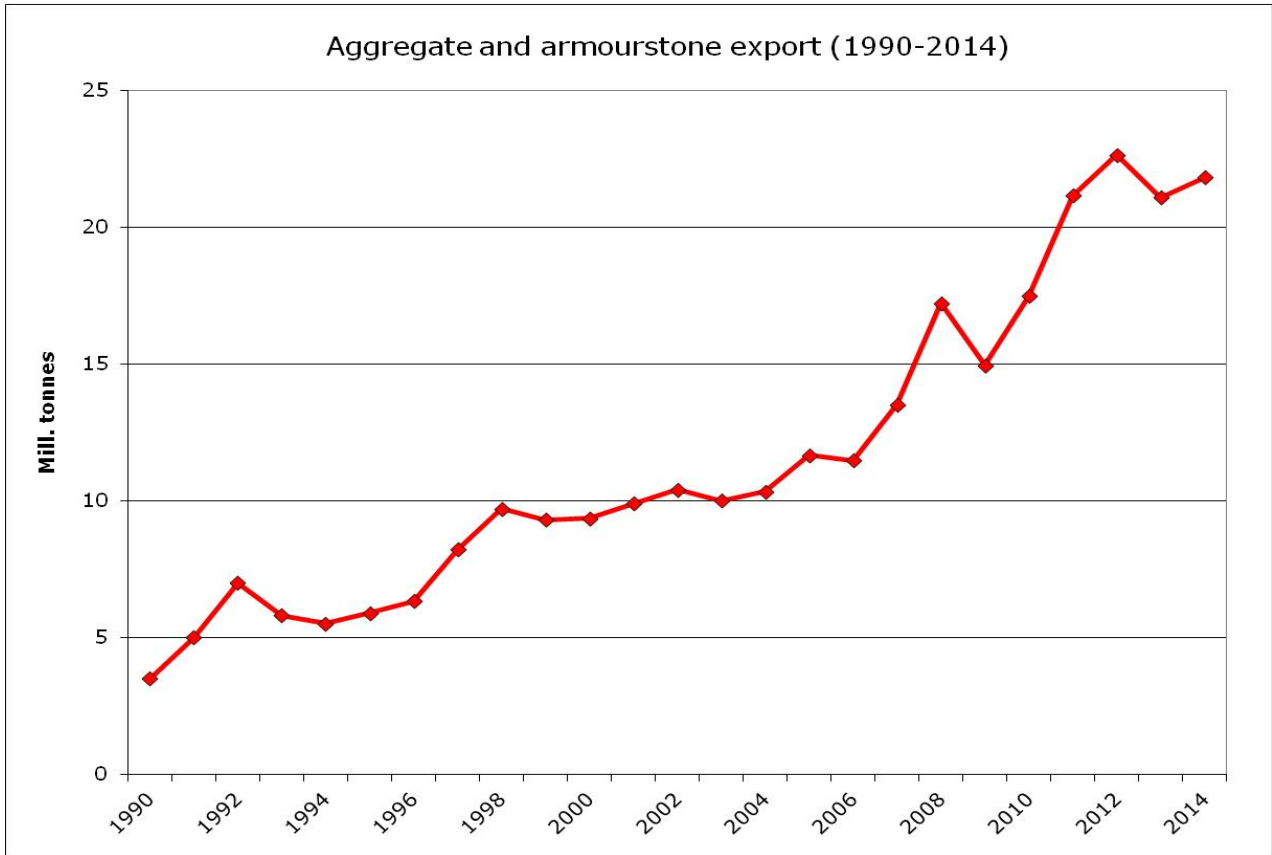

Total production exported 21.8 mill. tonnes aggregate, armourstone, sand and gravel, plus 3.3 mill. tonnes aggregate for offshore use.

Export/production values for 2013 in parentheses

Aggregate/armourstone 21.7 mill. tonnes
 Sand/gravel 0.09 mill. tonnes
 Ekport value 1282 mill. NOK/152 mill. EUR
 Offshore aggregate 3.3 mill. tonnes
 Reference: Producers - NGU

AGGREGATE EXPORT 1990-2014

Norwegian export of hard rock aggregate 1988 – 2014 to more than 9 countries in Europe.

Consumption of exported aggregates
